

AUNG MYO PAING

Final Year Student

PROFESSIONAL SUMMARY

Computer Science student with practical experience in web application development, backend programming, and database management, primarily using PHP, Laravel, MySQL, Java, and J2EE technologies. Experienced in developing academic and personal projects, troubleshooting real-world application issues, and working with MVC architecture, authentication, routing, and database-driven systems. Strongly interested in cybersecurity and secure software development, with exposure to cybersecurity education programs and developer-focused bootcamps. A curious and persistent problem solver who enjoys learning through hands-on development and continuously improving technical skills.

EDUCATION

Bachelor of Computer Science
(Undergraduate)
University of Computer Studies,
Taunggyi
Expected Graduation : 2027-2028

CERTIFICATIONS

- FDC batch - 23 (fullstack developer course)
- ACS 2nd generation

OTHER SKILL

Communication Skills
Team Collaboration
Problem Solving
Continuous Learning

EXPERIENCE & PROJECTS

QakBot Malware Analysis – Asian Cyber Shield Program
InternDoor – J2EE Web Application
POS_system - Laravel Web Application
SwiftFix - KBZ Hackthon (2025)

TECHNICAL SKILLS

Programming Languages:

- PHP, Java, Python, JavaScript, SQL

Web Development:

- HTML, CSS, Bootstrap, Tailwind CSS, Blade, Laravel 12

Backend & Frameworks:

- Laravel, J2EE, JSP, Servlets, JDBC, MVC Architecture

Database:

- MySQL, MariaDB, SQL Server, Database Design, SQL Queries, Eloquent ORM

Development Tools & Platforms:

- Git/GitHub, XAMPP, Composer, npm, Vite, Apache Tomcat, Visual Studio, VS Code

Cybersecurity:

- Cybersecurity Fundamentals, Web Security Concepts
